Inclusive Digital Learning & Assistive Technology Staged Intervention

The aim of the Inclusive Digital Learning and Assistive Technology Staged Intervention is to help us think about what learners require to ensure that they are included and can access digital learning, and who is responsible for supporting them. Many learners can be supported at the Universal Level through modern technology with built-in accessibility tools and universal design for learning. Some learners however require more targeted or specialist support from assistive technology services.

WHAT?

WHO?

Universal and Targeted, plus...

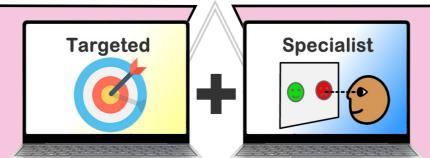

Personal digital technology with specialised AT

Personalised digital learning resources Specialised teaching approaches and settings

Personal communication resources

Personal AAC technology

Personalised support from AT specialists

Assistive Technologist / team e.g. CALL Scotland AAC specialist(s)
