

## About Us

My name is Leanne Reid, I have 19 years experience working with children who have support needs. I have worked in many different environments and I bring all of my experience and training together to create this group. I really enjoy my job and I am passionate about empowering parents and children with additional support needs to reach their full potential.

The VIP Club group sessions are booked in 4 week blocks and cost £10 per session (a reduced rate is available for families on low incomes). The group runs term time only.

There are currently two group sessions per week, running on Thursday mornings for children and afternoons from Inch House community centre. Please contact me for up to date times and venues, as more groups are starting soon. To book to come along for a free taster session:-

The VIP Club is a social enterprise. This is a non- profit organisation. The VIP Club has recently received funding and support from UnLtd.

The VIP Club is a structured group for children aged 0 - 5 years old with additional support needs

The VIP club is a supportive environment that offers hope, understanding and compassion. It is a place to meet other parents and children with an additional support need.

The groups we deliver support each child's development in many different area's such as;

- speech and language development
- signing
- listening
- fine and gross motor skills
- peer and child and parent interaction
- sharing
- turn taking
- eye contact
- waiting
- sensory stimulation
- following instructions
- supporting choice.

The VIP club offers the parent and child space to bond, have fun and share this experience with others.

The techniques, strategies and signing that are used within the group are explained so that you can use them at home too. We offer experiences that allow you to learn how to further support your child's development.

## The VIP Club Groups

Our group sessions are delivered in 4 weeks blocks. Each block has a theme such as festivals, weather, colour, numbers or messy play.

Within our groups we also offer important relaxation time. This is an opportunity for you and your child to lie down and have a cuddle, enjoy the moment and learn relaxing breathing techniques. We use the sound of a gong, singing bowls and other instruments to help everyone relax. The children also get the opportunity to explore these instruments at the end.
